

Protect Employees and Still Allow Full Access to Counters

- Easily hang sneeze guards where you need them
- Create secure connections between the sneeze guard and the ceiling
- We offer a variety of connectors for open beam and drop ceilings
- For finished drywall or wood ceilings, use an eye hook from your favorite hardware store and install per their instruction
- No need to drill holes in counter tops
- UrbanTrapeze™ works with steel cable to create a secure and adjustable connection to the sneeze guard
- LoopLine™ is a value priced option to steel cable
 - Reduces the number of parts required for a stable connection
 - Cuts to length with scissors
 - 25 lb tensile available in clear
 - Loops through itself to create a solid connection
 - Go to our “More Info” page for the LoopLine instruction sheet
- Visit our website or call for the best connection solutions for your retail environment
